Blades XL

Blades XL

BG269

114cm (L) x 23cm (W)

- Patent pending twin tip design
- Includes camo/elastic bindings

The latest addition to the Wakeski family is the Body Glove "BLADES XL". These skis are slightly longer and have a flat bottom to radically launch the rider off the wake. These are the wakeskis for REALLY BIG AIR. They're also big enough to slalom on.

U S A
MADE

Blades

Body Glove Blades Wakeskis are designed to be easy to get up on, easy to store, and most importantly easy to enjoy. At 40.5 inches, with a Patented twin tip design, these skis can cut, jump, flip forwards, backwards, and upside down for a wild new style of wake inspired fun. Perfect for the first time skier, or the most experienced wakeboarder, everyone can enjoy this unique sport.

S3 Tubes

Body Glove's Patent Pending S3 Technology™ is designed to give the rider maximum enjoyment and comfort by providing a seating area that is comprised of Neoprene stretched over the hole in the tube. S3 (Suspended Seating System) cradles the rider inches above the choppy water, providing a more comfortable ride, no matter what the conditions. In addition, all S3 tubes can be used as either traditional sit ins, or deck style tubes as well. This new technology takes towables, as well as your enjoyment of them, to the next level.

- 80" Wide dual donut
- 24 gauge PVC
- 420 denier nylon cover

- 24 gauge PVC
- 420 denier nylon cover

Comfort Top

omfort CT_{op}

Body Glove's new patent pending Comfort Top tubes are designed with comfort in mind. The Edge to Edge Comfort Top Covered surface provides a soft, comfortable riding area. Performance is important as well; the embossed "Hydroglide" finish on the PVC bottom moves through the water with less drag. These tubes will hold up through the most extreme riding conditions because of their heavy duty 30 gauge PVC construction, the one piece, high frequency welded quick connect, and 4 sewn, foam filled nylon handles.
